

FDE 30 / 60 / 90 — OKR Scorecard

Fill Actual at each horizon close · score every Key Result 0.0–1.0 · a horizon's score is the mean of its KRs

How to use. This is the companion tracking grid to Addendum 09. The Key Results and Targets are fixed; the three right-hand columns are for you to complete. At each 30 / 60 / 90 checkpoint, record the **Actual**, score the KR **0.0–1.0** (the fraction of target achieved — binary KRs score 0 or 1), and mark its status. Average a horizon's KR scores for its headline number. Treat ~0.7 as on-track; a steady 1.0 means the targets were set too low.

● Green — score ≥ 0.70 (on-track)

● Amber — 0.40–0.69 (at-risk)

● Red — < 0.40 (off-track)

DAYS 0–30 • Land & Charter

Objective: Establish FDE as a credible, chartered practice anchored by a live customer reference.

HORIZON SCORE

_____ / 1.0

#	Key Result (outcome)	Target	Actual	Score	R/A/G
1.1	Moductecture formalized as first reference; FDE Charter v1 signed.	Signed + ref.			
1.2	Target accounts identified and scored for embedded-FDE fit.	3–5 accounts			
1.3	FDE Charter v1 published (definition, FDE ↔ GCC, Loop™ v1, metrics).	Published			
1.4	Time-to-First-Value baseline established on the pilot.	< 14 days			

DAYS 31–60 • Codify & Prove

Objective: Convert one success into a repeatable, staffed practice that demonstrably transfers.

HORIZON SCORE

_____ / 1.0

#	Key Result (outcome)	Target	Actual	Score	R/A/G
2.1	FDE Loop™ Cookbook + Landing Runbook published (teachable, branded).	Both published			
2.2	FDEs identified / onboarding, each paired with an offshore pod.	2–3 FDEs			
2.3	Second account landed using the FDE Loop™ (proves transfer).	1 account			
2.4	Client-Authored Spec Ratio on the pilot by end of Month 2.	> 60%			

#	Key Result (outcome)	Target	Actual	Score	R/A/G
2.5	Agentic PR Merge Rate / Human Intervention Rate held flat.	> 90% / < 2 per 1k			

DAYS 61-90 • Productize & Scale

Objective: Make FDE a named, sellable, scaling practice line with a pipeline, dashboard, and co-sell.

HORIZON SCORE

____ / 1.0

#	Key Result (outcome)	Target	Actual	Score	R/A/G
3.1	"StatusNeo FDE" live as a named practice on the site and sales motion.	Live			
3.2	FDE practice dashboard live (accounts, expansion, pull-ratio, trust, NPS).	Reporting			
3.3	Reference accounts documented.	2-4 accounts			
3.4	Co-sell enablement delivered to all regions (WC, EC, EMEA, APAC).	All regions			
3.5	System Adoption Velocity / Platform Contribution Rate (Spoke→Hub).	> 75% / ≥ 2			

OVERALL ROLLUP

Days 0-30 ____ / 1.0	Days 31-60 ____ / 1.0	Days 61-90 ____ / 1.0	90-DAY MEAN ____ / 1.0

BEFORE YOU COMMIT TO THESE TARGETS

Several targets here — TTFV < 14 days, Spec Ratio > 60%, PR Merge > 90%, and the economics behind them — originate from June-2026 source briefings and are **pending verification**. A scorecard turns a target into a commitment you will be measured against. Confirm each number you are willing to own before this grid goes to the sponsor; adjust any that are aspirational rather than agreed.
